

Laboratori ARCHA Srl has the pleasure to invite you at the workshop:

*LIFE MULTIBIOSOL PROJECT:*

*Innovative fully biodegradable mulching films & fruit protection bags*

*for sustainable agricultural practices*

The LIFE Multibiosol Project (LIFE14 ENV/ES/000486) deals with the development of new biodegradable polymers for agricultural applications, e.g. mulching film and plant protection bags, with the aim to decrease the amount of waste produced in the agri-food sector.

The themes that will be covered during the workshop will therefore be innovative research on biodegradable polymers and materials, technological performance and possible applications of biopolymers, waste recovery and solutions for the recovery, focusing on goals of a circular economy perspective.

The main scope of the workshop is to illustrate different research projects based on the study and the development of innovative solutions and products in different fields, the most significant results, and also provide the possibility of creating new partnerships or creating future collaborations.

Below you will find the Workshop Agenda (English language) and the registration form (free), which we would like to receive filled in, within November 17th p.v. at the following contact:
